The NSF GRFP is a fellowship program that directly supports students in various STEM fields including social science and STEM education. Each Fellowship provides 3-years of support during a 5-year fellowship period. For each of the 3 years of support, NSF provides a \$37,000 stipend and \$16,000 cost of education allowance to the graduate degree-granting institution of higher education. This workshop is especially for seniors applying to graduate school next year. An overview of the application process, tips for strengthening your application, and developing a timeline for productive writing and submission will be discussed.
